Projects

Girly Girl Clutcher – Fashion Landing Page

Designed and developed a visually appealing, mobile-responsive landing page to showcase trendy hair clutchers targeted at a feminine audience. Focused on creating a clean and elegant user interface using only HTML and CSS, with a soft color palette and structured layout. The project emphasizes user-friendly navigation, aesthetic branding, and modern web design practices tailored for a fashion product showcase.

Restaurant Management System Website

Crafted a sleek and user-centric restaurant website that allows users to browse menus, place orders, and interact seamlessly. Utilized HTML, CSS, and JavaScript to build interactive features like dynamic menu listings, order forms, and real-time input validation. Focused on intuitive design, mobile responsiveness, and smooth user experience tailored for modern food businesses.

To-Do List Web App

Built a functional and clean to-do list web application using HTML, CSS, and JavaScript. Implemented features like adding, deleting, and checking off tasks with real-time interactivity. Focused on writing clean code, managing user input efficiently, and ensuring a smooth user experience with responsive design and dynamic DOM manipulation.

Chat UI Clone

Recreated a modern messaging interface using HTML and CSS, focusing on clean layout, message alignment, and responsive design to mimic real-world chat apps.

Mood Tracker App

Designed a simple and interactive mood tracker using HTML, CSS, and JavaScript to help users log and visualize their daily emotions. Implemented features like mood selection, emoji-based UI, and date-wise tracking to promote emotional awareness with a clean and engaging interface.

Education

Bachelor of Business Administration – Computer Applications (BBA-CA)

08/2022 – 04/2025

Modern college of arts science and commerce
